INTEGRATING DIVERSE DATA SOURCES USING A MARK-UP LANGUAGE

ABSTRACT

A method for processing source data from a plurality of diverse sources in a selected data domain includes
5 specifying a unified schema that lists markup tags in the selected data domain that can exist in a document in the markup language and defining correspondences of data fields from the sources to the markup tags listed by the schema. The source data are mapped in accordance with
10 the correspondences to generate unified data in the markup language.
